Day 4 - Thursday Afternoon	Visiting the city of Hannover.
Day 5 - Friday - 09.00-10.00	Documentation - signatures - certificates of participation. Management Team. Option of preparing convivial activities (music, art and more) to decide together

Description of activities and learning outcomes

ACTIVITY 1: Peer tutoring and collaboration

Peer tutoring activities - whether occasional or frequent - can deliver research-backed benefits to both the student-tutee and student-tutor. Different activities call for different approaches, of which tutors should have a basic understanding. Consider running exercises to teach students about:

Directive Tutoring: The tutor fills the tutee's knowledge gaps, explaining and exemplifying how to reach a specific solution. To do so, the tutor must be confident in his or her own abilities and knowledge.

Non-Directive Tutoring: The tutor asks open-ended questions, guiding the tutee to form his or her own conclusions about a given topic. To do so, the tutor should understand when and how to pose thought-provoking questions.

During a peer reading activity, for example, a non-directive approach can help students process content through their own words and thoughts.

Here are five benefits that exemplify the importance of peer teaching:

Increased Literacy Scores - Students who read and discuss story passages with their peers recall more content and score higher on assessments.

Developed Reasoning and Critical Thinking Skills -- Students who work in pairs and groups typically perform better on tests that involve reasoning and critical thinking. This is largely because students must become active learners, discussing and rationalizing lesson concepts in their own words.

Improved Confidence and Interpersonal Skills -- Many studies about peer teaching point to students building confidence and communication abilities. Tutees realize these benefits by asking questions and receiving immediate clarification.

Increased Comfort and Openness – Students generally identify more easily with peer helpers than with adult authority figures. This helps create an environment in which students are more comfortable to ask questions and work through challenging problems in an environment free from class ridicule.

Versatility -- You can run a range of peer teaching exercises based on different subjects and objectives, possibly involving other grades and classes. Lots of ideas can lead to lots of fun for your students.

ACTIVITY 2: **Visit to a foreign school and country**

School travel significantly increases student engagement in the classroom. Regular feedback we receive from clients is that students who lacked confidence before a school trip have gone on to flourish in the classroom upon arriving home.

This is because school travel helps students see the big picture. They learn the purpose of education and where their studies can take them. School travel also exposes strengths and helps students build confidence. For example, a child who struggles with essay writing may realize they are a great team leader. By understanding the purpose of education and recognizing their unique strengths, students will return to the classroom more motivated.

Participant list

#	FIRST AND LAST NAME(S)	ORGANISATION
1	CRISTINA DEROMEDI - accompanying teacher	ISTITUTO COMPRENSIVO MARCHETTI
2	SGRECCIA MASSIMILIANO	ISTITUTO COMPRENSIVO MARCHETTI
3	TURCHI SAMUELE	ISTITUTO COMPRENSIVO MARCHETTI

The signatories confirm that the information in this document is correct and complete.
