An aerial photograph of a vast, lush green forest covering rolling hills. In the background, a range of mountains stretches across the horizon under a clear blue sky. A small body of water is visible in the distance on the left. The overall scene is serene and natural.

camillo **sirianni**®

COMPANY PRESENTATION

camillosirianni®

Camillo Sirianni has been producing high quality furnishings for schools worldwide since 1909. Combining more than 100 years of experience with the latest in manufacturing techniques and materials technologies we bring to the market a high quality product at an extremely competitive price. Production is carried out entirely within our custom built factory in Italy allowing us to be highly flexible to market requirements, price conscious at all phases of production, and enabling a holistic approach to quality management.

All raw materials are of Italian origin and where possible sourced locally. Our new state of the art transport warehouse and our vicinity to major road, rail, sea, and air networks, mean that transport costs and times are kept to an absolute minimum.

Our commitment to environmental and social responsibility has been widely acknowledged through many internationally recognized certificates. Management and safety policies all follow best practice and are certified according to ISO standards.

We strongly believe that the future is in educating our children in an environment which should be safe, stimulating and comfortable. 110 years of experience, Italian design, safe ergonomic shapes and quality materials lets us deliver the future today.

A LITTLE HISTORY

FURNISHING SUCCESS SINCE 1909

IT STARTS HERE

Angelo Sirianni starts the company in 1909

1909

EXPAND SOVERIA FACTORY

The factory expands to its present 5000m2

2000

100 YEARS

Celebrate the first 100 years of the company

2009

OPEN NEW SOVERIA FACTORY

The factory moves to its current site with a purpose built structure.

1982

Production externalization (about melamine component)

2004

2010

OPEN NEW LOGISTICS HUB

A new purpose built logistics hub was started 500 m from the Soveria Production plant.

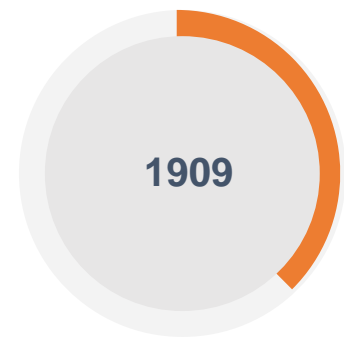

2020

THE FUTURE

Still in the ownership and management of the Sirianni family the third generation faces the challenges and opportunities of the future

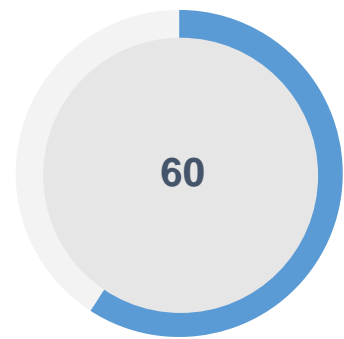

KEY FACTS

Over 110 years

Camillo Started business over 110 years ago and is still owned and managed by the same family.

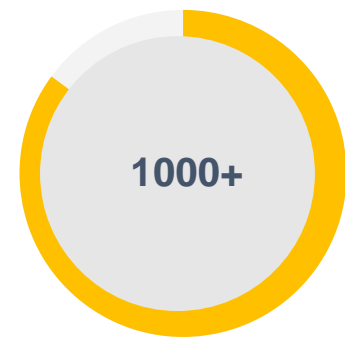

Employees

We currently have a staff of 60 people between production and head office

Locations

We have 3 key manufacturing and logistic locations

Products

We offer in excess of 1000 products for the education sector.

Head Office

The Soveria Mannelli Factory is at the heart of all operations, located right next door to the company's head office. All metal work including cutting, bending, welding, and finishing is carried out here. In addition the company's specialty of solid wood edging is also done here together with finally assembly and QC procedures. The site is approx. 5000m².

Plant

The Soveria Mannelli Factory is at the heart of all operations, located right next door to the company's head office. All metal work including cutting, bending, welding, and finishing is carried out here. In addition the company's specialty of solid wood edging is also done here together with finally assembly and QC procedures. The site is approx. 5000m².

Logistics

Located just 500m from the Soveria Factory is the new Logistics hub warehouse. Completed in 2018 it provides 3000m² of racked logistics space and allows us to both separate and consolidate in coming and out going merchandise. With 4 dedicated container hatches it gives us the logistical capacity to deal with our increasingly diversified supplier and customer bases.

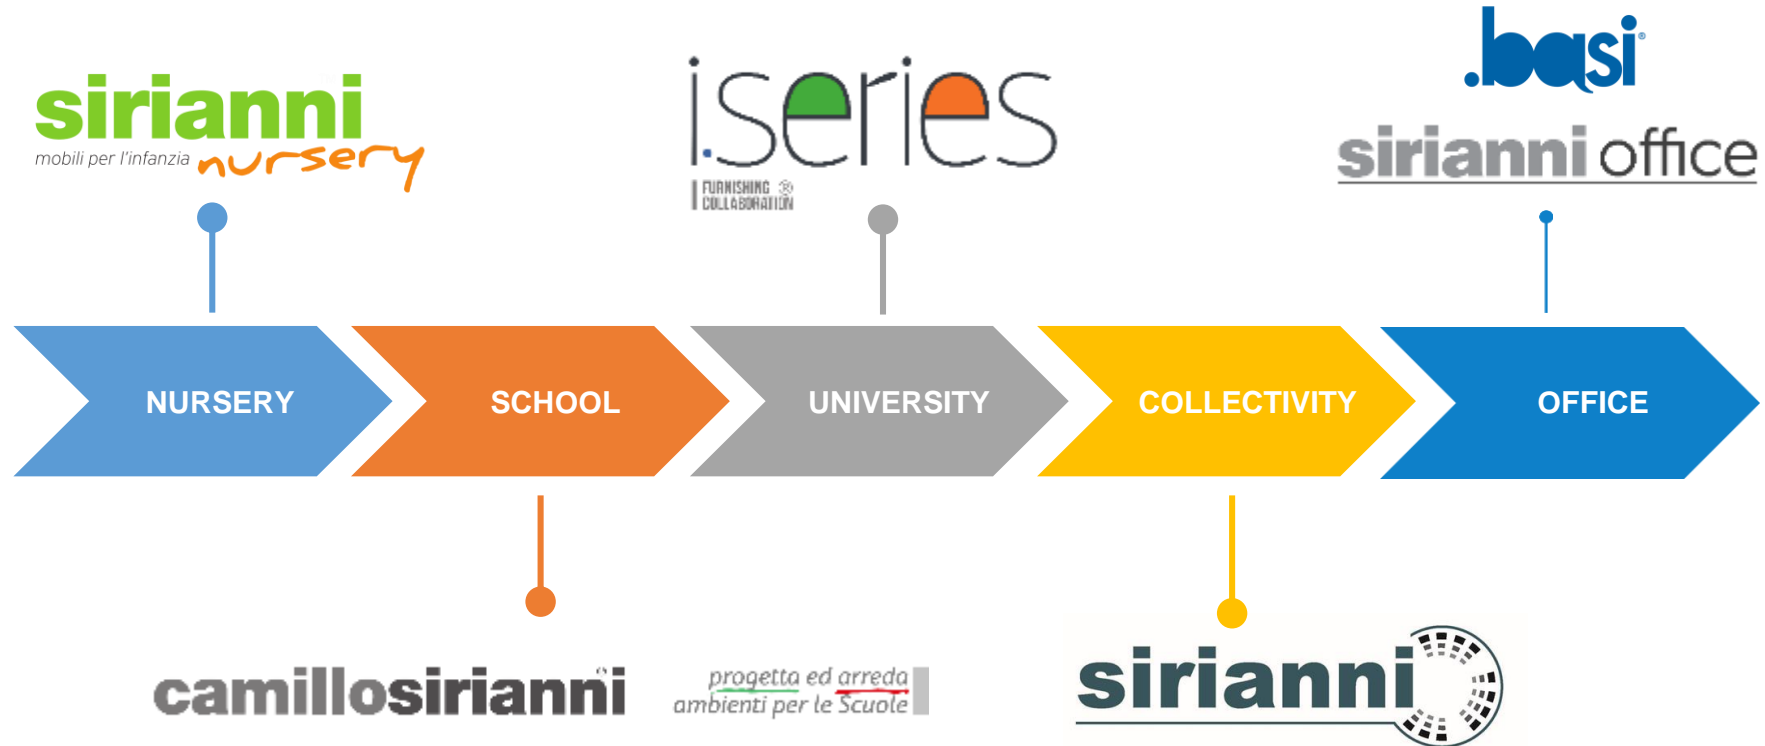

Panel work

It's specialized into the work panel (cut, edges apply, kit packaging)

iSeries

FURNISHING®
COLLABORATION

The ISERIES incorporates a full spectrum of products to furnish the Collaborative learning environment. From the I.CAN mobile workstation, the COLLABOR8 and Elements table ranges, through the I.TEACH and I.STORE ranges, all the components are designed to work in seamless harmony within the teaching environment. While the whole range is highly student focused we have also provided practical solutions for educators giving the flexibility of movement and space management with the least possible effort.

sirianniTM

mobili per l'infanzia *nursery*

Sirianninursery is a project designed to make cozy children's spaces. In the search for solutions, and in the choice of curious and challenging shapes, we decided to design from the children's point of view. We make furniture which is both aesthetically pleasing and also functional and comfortable, ensuring familiarity, the opportunity for learning and fun.

Camillo Sirianni introduced a new range born for furnishing great community spaces and University classrooms. Products shown are entirely designed and manufactured within the company using the help and the counseling of national and international experts in the field: all the products meet the ergonomic and anthropometric principles issued by European Standards (EN) and the International One (ISO). Products quality is guaranteed by a strict control on the management system, from the raw material purchasing, exclusively Italian.

sirianni office

Sirianni office is the Office Division of Camillo Sirianni Sas. A structure born of a hundred year experience in the production of furnishings for the community, to propose innovative and functional furniture lines in the office world. Sirianni office is synonymous with furnishing solutions that respond to the needs of contemporary office and living in community spaces. Layout variability, group work, location sharing, reception and high representation. The objective is to transform every environment into the ideal workplace, where one can live well every day in harmony with oneself and with what surrounds us.

.basi®

Ba.si. Collection offers office furniture comfortable and with a good design, conceived to play a lifestyle based on a sober luxury, refined and timeless. Lively style furniture and at the same time discrete with great value finishes, which add charisma defining a typical Italian temper. Ba.si it's a project born from the efforts of La Baligia S.r.l. and Camillo Sirianni S.as.

Certified management system for wood processing
Sistema gestione uso legno certificato
FSC

Conforming to the [ISO 9001](#) standard has many benefits to the manufacturing industry. ISO 9001 helps inspire companies to find more effective ways to permanently resolve quality and other cost-related problems while encouraging businesses to find creative ways to exceed customer-specified requirements. This standard helps businesses identify, document, and improve systems that address both written and “implied” customer requirements such as:

- **Safety standards**
- **Environmentally-friendly manufacturing**
- **Expected production efficiencies**
- **Dimensional and functional specifications**

ISO is an international body and as a result, it's standards help ensure that products manufactured in different companies and/or countries manage their businesses in a way that promotes collaboration. This improves both national and international trade, while reducing costs to all parties.

Since ISO standards mandate continuous improvement, ISO 9001 registered businesses tend to reduce overall errors which, in turn... eliminates waste. Companies that embrace ISO standards as part of their culture generally enjoy higher customer satisfaction, fewer errors, reduced costs, and a competitive edge.

Values, strategy and objectives of a company are expressed in its policy, and one of the cornerstone policies of Camillo Sirianni is environmental protection. This is done daily through:

- Compliance with voluntary and mandatory International standards;
- Pollution prevention;
- The progressive reduction of emissions, waste and resource consumption;
- Cooperation with Public Authorities and communication with the population, through an open dialogue on environmental matters;
- Appropriate information, training and awareness of all staff on environmental issues, in order that all employees, at all levels do their work with respect for the environment;
- A strong awareness of suppliers and a preference for those who show their commitment to environmental protection and pollution prevention;
- The goal of realizing all products with both recycled and recyclable materials.

Our factory is located in the heart of Sila, one of the largest woodlands in Europe.
