

Ravenna, 1985. Lives and works in Milan.

Luca Maria Baldini finds his own path in the relation between music and images. In a not -labelling dimension, it ranges from electronics to postrock / shoegaze, passing through minimalism and neo-classical. In his creative process the sound came out of images ,to starts then living its own life. His songs become soundtracks without movies, where each listener has the space to recreate a visual imagenary in his own way.

Baldini composes soundtracks for several theater show, films, installations and performances. He presented his work in national and international galleries and museums and he played in Italian/European stages. He creates commissioned site-specific soundtracks. His research is focused on the use of melody through the fusion of electronic music, analog instruments and sound design.
